# Co2 emissions from oil production Sector

# Thesis

Designed a dashboard to visually analyze the effect of oil(gas) production in the world and its impact on the environment in form of carbon dioxide (co2) gas emissions

# Why?

## Why oil production?

Globally contributes 3% GDP to the world's economy

## Does the world care?

Assess whether the world cares about the balance of socioeconomic development sectors (oil production) with the environment

# Oil Production Center Infrastructure

# Dashboard Demo
